

PTA

Our counseling department's mission is to not only help students achieve success academically, emotionally, and socially, but to also be a resource and support for parents and educators. We have enjoyed presenting to the PTA on various topics that impact students at the middle school. Our presentations provide insight into difficult issues that may arise for both parents and students. Attendance at the monthly meetings by one of our counselors helps us stay connected to the parents and keeps us aware of issues that students may be experiencing at the middle school. Our involvement with PTA is extremely beneficial to all. See you at the meeting
